

## ASTRONOMY 10

### **Stellar Astronomy** De Anza College Winter 2021

Instructor: Eric Peterson, Ph.D.

Email: [petersoneric@fhda.edu](mailto:petersoneric@fhda.edu)

Office Hours: Tuesday and Wednesday, 6:30 to 7:20 p.m. by synchronous email

Textbook: <https://openstax.org/details/books/astronomy>

(Select your preferred option under the header: Get This Book.)

### **Introduction**

Astronomy 10 is an introductory course which is intended to provide a survey of our knowledge of the stars, galaxies, and of the entire universe. We will examine both the history of humanity's quest to understand the cosmos as well as the current state of that understanding. The course has no prerequisites. However De Anza College does advise the following: English Writing 1A or English as a Second Language 5. The class is taught with the non-science major in mind.

### **Format**

I am trying to keep things simple. Each week I would like you to do the following:

1. Read the assigned reading for that week
2. Watch assigned powerpoint lecture(s)
3. Watch assigned video(s)
4. Take a short quiz

The reading assignments are on the next page of the syllabus. In addition there will be a midterm exam during week six and a final exam the week of March 22.

### **Exams and Grades**

Your class grade will be based on weekly quizzes, a midterm exam, and a comprehensive final exam. All will be online through Canvas. The quizzes will constitute 50% of your grade. The midterm and the final will each be 25% of your grade. The questions will all be of the T/F or multiple choice variety

## **Reading Assignments**

<b><u>Week of</u></b>	<b><u>Chapter</u></b>
1. January 4	1, 2.1-2.3
2. January 11	2.4, 3, 4.1-4.2, 4.5-4.7
3. January 18	5-6
4. January 25	15-16
5. February 1	17-19
6. February 8	20, 21.1-21.2, 22
7. February 15	23-24
8. February 22	25
9. March 1	26-27
10. March 8	28
11. March 15	29
12. March 22	Final Exam

**Student Learning Outcome(s):**

- \*Appraise the benefits to society of astronomical research concerning stars and stellar systems.
- \*Evaluate the impact on Earth's characteristics of the evolution of stars and stellar systems.
- \*Evaluate astronomical news items or theories about stellar astronomy based upon the scientific method.
